

How is energy produced in Cameroon?

With a total installed capacity of 1,292 MW, the mix of energy production of Cameroon consists of 57% of hydraulic power source, 21% of thermal springs in the gas, 10% of heat source to light fuel oil and 13% of heat source to heavy fuel oil. The oil sector is managed by the national oil company Soci t  Nationale des Hydrocarbures .

Does Cameroon have energy potentials?

From this paper, it is obvious that Cameroon has huge energy potentials. There are proven deposits of crude oil, large rivers, biomass and solar energy that have not been fully utilized. Energy production from hydropower has been the main focus of the governments for many years.

What drives Cameroon's energy demand?

Cameroon's energy demand is driven by demographics (urbanization, population growth, etc.), macro and socioeconomic indicators (income per capita, employment rate, etc.), government policy targets, and technological advances.

Why is Cameroon stepping up its renewable generation?

The government of Cameroon plans to step up its renewable generation to increase the rural electricity access rate, diversify the generation mix and achieve greater energy security as part of its NDC.

How can power generators meet the electricity demand in Cameroon?

Three scenarios are developed, and the allocation of power generators to meet the electricity demand at a particular time is based on the 25% renewable energy target in the Cameroon NDCs by 2035, the GDP, the load duration curve, and the mean plant capacity factor which are entirely stated exogenously.

How to increase solar energy in Cameroon?

In order to enhance solar energy in Cameroon, the government recently signed an agreement with China to carry out feasibility studies aiming at installing several light points in Yaound . Recently, Cameroon obtained eKiss (energy-keep it simple and safe) mobile off-grid photovoltaic systems from Antaris Solar .
