

How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

Why is energy in Equatorial Guinea declining?

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data.

What are the different types of energy transformation in Equatorial Guinea?

One of the most important types of transformation for the energy system is the refining of crude oil into oil products, such as the fuels that power automobiles, ships and planes. No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity.

What transformations are taking place in Equatorial Guinea in 2022?

No data for Equatorial Guinea for 2022. Another important form of transformation is the generation of electricity. Thermal power plants generate electricity by harnessing the heat of burning fuels or nuclear reactions - during which up to half of their energy content is lost.

How much oil does Equatorial Guinea produce a day?

In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes.

When did Equatorial Guinea start producing oil?

The country began oil production in the late 1990s and began LNG exports in 2007. Get updates on the IEA's latest news, analysis, data and events delivered twice monthly. Electrification rates are relatively high in Equatorial Guinea at 66%. The country began oil production in the late 1990s and began LNG exports in 2007.

GOAL: to promote an understanding, on a global scale, of the dynamics of change in energy systems, quantify emissions and their impacts, and accelerate the transition to carbon-neutral, environmentally benign energy systems while providing affordable energy to all.

renewable energy in different countries and areas. The IRENA statistics team would welcome comments and feedback on its structure and content, which can be sent to statistics@irena. Last updated on: 31 July, 2024

Countries that rely heavily on imported energy may be vulnerable to supply disruption from external events such as the Covid-19 pandemic and the war in Ukraine. In countries that export large amounts of energy, falling energy prices can also cause major economic shocks.

Electricity can be generated in two main ways: by harnessing the heat from burning fuels or nuclear reactions in the form of steam (thermal power) or by capturing the energy of natural forces such as the sun, wind or moving water.

Equatorial Guinea and Nigeria signed a regional gas supply deal in August 2024 to process Nigerian gas at Equatorial Guinea's Punta Europa LNG processing facilities, ushering in a new era of West African gas trade, ...

Sausio 10 d. tarptautine energijos terminalu operatore AB „Klaipėdos nafta“ vercia nauja istorijos puslapi ir tesia veikla nauju juridiniu pavadinimu - AB „KN Energies“. ...

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries.

Equatorial Guinea and Nigeria signed a regional gas supply deal in August 2024 to process Nigerian gas at Equatorial Guinea's Punta Europa LNG processing facilities, ushering in a new era of West African gas trade, energy security and regional cooperation.

Equatorial Guinea: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

In Equatorial Guinea, we have been marketing products and services since 1984 through our network of service stations and to our business customers. We lead several community outreach initiatives in the country. Want to work in the ...

Electricity activities in Equatorial Guinea from legal framework perspective are provided by the Fundamental law which contains some provisions on energy. The main sector policy is contained in the Hydrocarbons Law (Law No. 8/2006).
