

Is Eqube ul & IEC certified?

EQUBE Integrates UL and IEC Certified Battery Energy Storage Systems (BESS) Combined With Intelligent Operation And Management Software Platforms. EQUBE BESS is scalable, modular, safe, reliable and comes in the factory built, fully tested equipment in outdoor IP54 rated enclosures.

What types of energy management systems does Eqube Bess support?

EQUBE BESS can be AC-Coupled or DC-Coupled, operates in both On-grid or Off-grid applications with everything needed to connect directly to any buildings or utility network through our energy management system with simple installation, easy maintenance, and flexible configuration solutions.

What is Eqube EMS?

EQUBE EMS provides full command, control, monitoring and management functionality for a single energy storage asset or a fleet of assets located anywhere in the world. The EQUBE EMS solutions have been deployed globally across many different industries in many different applications.

What can Eqube do for You?

eQube is your partner at any stage in your BESS development. From project assessment to design, system integration to commissioning- leverage eQube's expertise in whole or in part to help your business succeed.

Is Eqube safe?

With SAFETY at the top of its priorities, EQUBE responds positively to international standard tests by testing its full range of BESS products - from battery cells, modules to outdoor rated enclosures. Every product is tested safely with mild and short smoke and complies with NFPA 220 and NFPA 855 requirements.

EQUBE POWER LTD., is developing fully integrated DC-Coupled LFP battery energy storage system & software to help small commercial and industrial building owners, business owners, and...

eQube is a global leader in creating modular and flexible designed battery energy storage systems. From small commercial BESS to large scale utility BESS implementations, our experts will design, build, and commissioning of BESS that support all your energy needs.

EQUBE POWER LTD. is embarking on a microgrid project aimed at enhancing energy efficiency and reliability in USA & Canada market. The project involves analyzing the current microgrid setup to identify potential improvements in energy distribution specially in PV solar + storage + EV Charging infrastructure upgrades.

Our experienced Battery Energy Storage Systems team can help you at any stage in your project. We will help you manage everything, from conceptual design all the way through to project commissioning and post-production support. eQube is your reliable energy storage system project partner every step of the way.

With A-Turbo technology, the Andes 1500 delivers a high power output of up to 3600W, capable of powering heavy-duty devices. Connected to our smart app, it ensures reliable backup power whenever needed. The Andes 1500 features a versatile design with 13 output ports, including AC, DC, car socket, USB-C, and USB-A.
