

Which markets does Rantec serve?

Rantec began serving the mining, explosives, and petroleum industries in 1982. Since then, we have expanded to serve a wider variety of markets, including erosion control, drilling, enhanced oil recovery, and environmental remediation. Rantec's binding and pelletizing aids are also part of the markets we serve.

What does Rantec Corporation do?

Rantec Corporation specializes in polymer product development, manufacturing, and supply. Since its beginning in 1982, Rantec has served the mining, explosives, and petroleum industries. However, the company has since evolved to serve a wider variety of markets.

What can Rantec do for You?

The Rantec portfolio includes state-of-art switch modules, as well as plug-and-play switch boxes and switch systems. We give you the flexibility to choose from a number of standard products, or we design your custom solution based on your requirements, using our scalable switch platform. The future is data driven.

What makes Rantec RF test equipment different?

Quality, Performance, and Usability are key aspects of the RF Test Equipment at Rantec. All products at Rantec are designed, engineered, and manufactured in Sweden. Make your ideas real and products better.

Rantec's VPX270 high performance, multiple output 3U military power supply addresses the needs of today's military for VITA 48 / VITA 62 plug-in applications. It operates from nominal 270VDC input, including normal and abnormal transients per MIL-STD-704E. The VPX270 provides 6 outputs at up to 500W

Rantec Power Systems Inc., is a designer and manufacturer of Engineered Power and Electronic Systems for Tier 1 contractors in the Military & Aerospace markets. We are an engineered ...

Rantec Power Systems Inc. Los Osos, California Job Description Title: Software Engineer - Senior Date: April 2022 Department: Engineering FLSA Status: Exempt Reports To: Software Manager Scope Develops, creates, and modifies embedded microcontroller software and digital/analog control systems.

Rantec serves the Defense Electronics market with engineered power conversion solutions. Rantec products are engineered to meet the most demanding specifications, delivered on schedule, with the highest standards of quality assurance, and exceptional customer service.

Rantec's 270V 3U 750W high performance dual output defense power supply is developed in alignment with the SOSA(TM) Technical Standard and addresses the needs of today's military for VPX plug-in applications. With a standard 270VDC input, this power supply delivers

Rantec offers unique solutions for ruggedizing commercial grade switch / server / data storage systems to make them suitable for military grade applications. This process includes commercial product analysis, identification of electrical and mechanical design changes required, product modification and detailed verification. ...

Our customers are defense technology leaders who value commitment and performance. Rantec is a preferred supplier to many, and is regularly recognized for our exceptional performance in the areas that matter most to our customers: on-time-delivery, quality products, and exceptional customer service. We are the "Best Value Partner."
