

Estonia-based energy company Eesti Energia plans to install what will be its home country's first grid-scale battery energy storage system (BESS), of 25 MW/50 MWh in size. Image by: Eesti Energia. The state-owned ...

Eesti Energi has completed the procurement for its 26.5MW/51MWh BESS, the first of that scale in Estonia, with LG Energy Solution among the successful parties. The battery energy storage system (BESS) will ...

The BESS will provide backup at high-speed and automatically activate frequency regulation reserves, and at a much lower cost than conventional power plants are currently doing, AST said. Both projects will be ...

We hear from utility Eesti Energia about its 25MW/50MWh BESS project in Estonia, including what it hopes to achieve with the project and why it needed a second procurement to launch ...

Estonia is targeting an exit from electricity production from shale gas and a 40% renewable energy mix by 2030. The BESS is the first large-scale project in the country but smaller-scale projects are being supported through a ...
