

European and American photovoltaic panel tariffs

What happened to solar panels after Biden paused tariffs?

In the two years since the Biden administration made the decision to pause the tariffs, solar prices have cratered, and solar panel imports have surged.

Are tariffs hurting solar projects?

Many U.S. panel plants are owned by large China-based manufacturers. Solar project developers also worry that tariffs will hurt their business by driving up the cost of panels, which are already more expensive in the U.S. than anywhere else in the world.

How have Chinese manufacturers responded to US solar tariffs?

Chinese manufacturers have responded to U.S. solar tariffs by moving their massive operations to nations where they will not face duties- including Southeast Asia.

Did Obama impose tariffs on Chinese solar panels?

Recent US presidential administrations from both parties have levied tariffs on imported solar panels. In 2012, the Obama administration imposed tariffs on Chinese solar manufacturers under anti-dumping and countervailing duty (AD/CVD) laws.

Will Biden increase US import tariffs on Chinese solar panels?

Last week, President Biden announced plans to increase U.S import tariffs on Chinese solar cells and panels from 25% to 50% among a host of other products, on the grounds of unfair Chinese business practices.

Who pays for solar tariffs?

Solar tariffs are collected by customs agents. While the buyer ultimately pays for the tariffs in the long run, the immediate financial responsibility depends on the import technique - EXW, FCA, DDP, etc.
