At Evero we are reimagining waste. Where others see a problem, we see a solution. Our low carbon energy recovery facilities turn waste into electricity. Our fleet of assets has a total capacity of 145MW. We divert around 1 million tonnes of waste from landfill every year. Evero is working to bring our planet back in to balance.

Evero mothballs Hull waste-gasification plant as sale considered. Gasification-equipped facility has struggled to process waste at the volume needed to make it economically viable and it has ...

Ince Biopower is an energy recovery facility in the Protos Energy Park, recovering energy from waste wood. As much as 4.5 million tons of wood waste are generated a year in the UK. This ranges from industrial wood waste, such as MDF panels that fail quality control, through to the wood collected at household waste recycling centres.

The company said that the new Energy Works waste to energy plant is designed to reduce the need to for local landfill as well as relying on fossil fuel generated power to meet local energy demand. Once operational the plant is expected to be able to generate up to 28MW of electricity, or which around 25 MW will be exported to the grid with 3 MW ...

Madagascar: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO 2 - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

The Energy Academy, shown in the foreground, forms part of the £200m Energy Works power plant. The 25MW facility will use fluidised bed gasification and is planned to produce energy to power 43,000 homes by processing 240,000 tonnes of refuse-derived fuel annually.
