

Where does Moldova get its electricity from?

electricity markets of the Republic of Moldova. Apart from not large-scale renewable energy capacities, the balance of electricity demand in Moldova is supplied from Ukraine and the ATULBD (from the thermal power plant CJSC "MGRES", owned by the Russian company "Inter RAO"), which together

What are the characteristics of the energy sector in Moldova?

in particular with regard to the following. A characteristic feature of the energy sector of the Republic of Moldova is the acquisition of significant volumes of imported energy from a single source, without recourse or the possibility of using tools to diversify supply routes, providing in such conditions about three-quarters of

Why does Moldova need a new energy system?

needs and attraction of private investments. Given the increasingly urgent need for Moldova to ensure its energy security, including by strengthening its connections with the EU energy system, as well as the high ambition in its domestic and international commitments, and the considerable challenges in the energy sector, there is an immediate need

What are Moldova's energy policies?

Energy Ministry and the Energy Charter Secretariat. By approving the Laws on Natural Gas and Electricity in May 2016, Moldova transposed most of the provisions of the Third Energy Package of the Energy Community into national legislation, however, much remains to be done. Renewables and energy efficiency regulations are also in the process

Is natural gas a threat to Moldova's energy security?

Most important imported fuel is natural gas. In 2020, all imported natural gas was supplied from Russia. This creates a significant and main threat to the energy security of the Republic of Moldova, since for a long time the supply of gas from Russia through Ukraine was the only route. Enabling the supply of natural gas from

Does Moldova have a competitive electricity market?

Regulatory framework in Moldova is still ongoing. The Energy Community acquis related to the electricity sector is either only partially transposed or partially implemented. The current legislative framework only allows limited competition in the electricity market. A truly competitive market can only be created with the
