Frequency and voltage stability is a challenge as power systems move towards a more renewable future. This study focuses on the power system of Suðuroy, Faroe Islands, which is in the transition towards 100% renewables.

The Faroe Islands have made a significant leap in their renewable energy journey, thanks to the integration of a battery energy storage system (BESS) from Hitachi Energy. During 2022 and 2023, the BESS has increased the share of renewable energy, primarily wind and hydro, in the islands' energy mix to 50% in 2023.

Explore the latest CSB battery solutions on our website to discover how these products can power your next project. Whether you need reliable energy for telecom, UPS, renewable energy, or e-mobility, we are the trusted partner for your power needs.
