

Does Ferrari F50 have a Fiamm recombining battery?

The FIAMM Ecoforce sealed, recombining battery was installed on the new Ferrari "F50". Acquisition of the Czech battery manufacturer Akuma and of two commercial companies in Germany Akkuschmidt and in G.B. Euro Battery Distribution.

Who owns IBC - a major distributor of motive power batteries?

Acquired IBC - a major distributor of motive power batteries. Formed joint venture with Minda in India for the production of horns for cars and motorbikes. The share structure is consolidated to two family groups with Stefano Dolcetta (Managing Director) and Alessandro Dolcetta (Vice-President).

What is a lithium battery pack?

Since 2007, SCE has been designing lithium battery packs replacing batteries with traditional technologies, such as lead acid or gel ones. These systems have extremely compact dimensions, a high number of guaranteed charge and discharge cycles and the possibility of very fast charge (up to 3C).

The Company was created following its separation from the FIAMM Group as a separate entity focusing on automotive and industrial batteries with lead-acid technology. -The Company's development of battery solutions for the mobility industry have recently focused on Absorbant Glass Material (AGM) and Advanced Flooded Batteries (AFB) for the ...

FIAMM Energy Technology is a multinational company engaged in the production and distribution of batteries and accumulators for motor vehicles and for industrial use born following the separation from FIAMM Group of the business of automotive batteries and industrial batteries with lead-acid technology.

FIAMM FIT range of valve regulated batteries has been designed for high reliability and safety front terminal telecom installations. FIT battery range has front terminal design ideal for installation in 19" and 23" racks; it allows easy access for maintenance reducing the installation footprint and maximising the energy density.

FIAMM FIT range of valve regulated batteries has been designed for high reliability and safety front terminal telecom installations. FIT battery range has front terminal design ideal for installation in 19" and 23" racks; it allows easy ...

FIAMM FIT range of valve regulated batteries has been designed for high reliability and safety front terminal telecom installations. FIT uses proven VRLA technology with 99% internal recombination efficiency, is non-spillable and maintenance free

The company's operations include the design, development and manufacturing of lithium-ion polymer batteries, battery systems and battery-related products for clean electric transportation and utility-scale energy

storage, thereby enabling smart grid power and automotive industries to get maintenance-free batteries at reasonable prices.

They are building Italy's first "Gigafactory", a state-of-the-art facility to satisfy rapidly growing demand for lithium-ion cells for electric vehicles, industrial equipment, grid battery storage and other applications.
