Ignitis Renewables, a leading international green energy company operating in the Baltic states and Poland, has made the final investment decision on its 239 megawatt (MW) solar portfolio in Latvia, the largest of its kind in the Baltic states, with construction works to commence in the first quarter of this year.

Even in Latvia, where sunshine is not as prevalent, solar panels are a sound investment, able to pay for themselves in savings over a few years. However, the Baltic States are far behind the EU average in terms of use of ...

Even in Latvia, where sunshine is not as prevalent, solar panels are a sound investment, able to pay for themselves in savings over a few years. However, the Baltic States are far behind the EU average in terms of use of solar panels, and Latvia's contribution to total installed capacity in the region is only 2%.

The largest solar power plant in Latvia - Kalkunes SPP - has commenced production in the Augsdaugava district. The project was developed by Merito Partners and Saules Energy with EUR 10 million investment from Latvian investors and co-financing from Swedbank.
