

Will Fiji be able to source 100 percent of its energy?

Suva, Fiji, October 21, 2020- A landmark agreement between Energy Fiji Limited (EFL) and IFC to deliver the largest solar project of its kind in the Pacific to date has been hailed a transformative step that will take the island nation closer to its goal of sourcing 100 percent of its energy needs from renewable sources.

Does Fiji have solar power?

According to the annual reports of Energy Fiji Limited (EFL), there has been some solar electricity generated from 1998 to 2007 by solar PV system that was commissioned in November 1997 (FEA 2016). In 1998, this system generated around 12 MWh of electricity and was doing well for almost 6 years.

What renewable resources are available to Fiji?

The analysis of data for different sources of energy demonstrates that the potential renewable resources available to Fiji are hydropower, solar energy (photovoltaic and thermal), bioenergy, wind energy, ocean energy, tidal energy and geothermal energy.

What are the benefits of solar energy in Fiji?

Bright sunshine hours over Nadi, Fiji. Direct and indirect use of solar energy is popular in Fiji. The tourism sector uses water heaters to reduce the consumption of conventional electricity and indirectly reduce the emission of greenhouse gas.

Can solar PV help Fiji achieve 100% electrification?

Fiji is a small island developing state and its numerous geographically dispersed islands present unique challenges for 100% electrification. Solar PV can help establish distributed systems to provide electricity to un/underserved population.

What is the best source of energy for Fiji?

The presence of rivers, mountains and data on rainfall makes hydropower the best significant source of energy for Fiji. Solar energy has vast applications. Water heating, drying crops, fish and fruits can be carried out with the use of solar thermal devices which utilize the thermal application of solar energy.
