

Are thin-film PV solar panels a viable option?

With the latest technological advancements and innovations, you can now get a commercially viable thin-film PV solar panels offering revolutionary simplicity; Thin-film PV solar laminates are light-weight, easy to install, require no penetrations made to your roof and can last for quite a long time. Read more about it below:

What are flexible solar modules?

Our FLEX series high-performance thin-film solar modules are lightweight, flexible and powerful. These modules can be directly bonded to metal roof systems using simple peel-and-stick technology--easing installation and eliminating the need for solar racking, which reduces weight load and significantly lowers project costs.

Are crystalline solar panels better than thin-film solar panels?

Crystalline solar panels can generate twice the amount of electricity of the thin-film solar panels. However, crystalline panels are bulkier, and use a special mounting system, which requires roof penetrations. The only exception is a standing seam metal roof.

Are thin film solar panels good for metal roofs?

MiaSol<sup>®</sup>, a California-based thin film solar panel manufacturer, markets its panels as an ideal option for properties with metal roofs. Solar panels are highly durable. Most will last at least 25 years--some are even covered under warranty for 40 years.

How to install a flexible panel?

For flexible panel, please use silicone structural adhesive for installation. Please apply silicone without any gap. The thickness of the adhesive should not be less than 4 mm, and the width should not be less than 10 mm. If possible, apply adhesive on the center of the back of the panel to enhance installation liability.

Can flexible Thinfilm PV be used on metal roofs?

This market overview only goes to further emphasize that when used on metal roofs, flexible thinfilm PV produces an operational and environmentally friendly roof system that generates renewable, clean, green energy, one that will continue to do so for many years to come.
