

Does French Guiana have a pluriannual energy program?

As Guadeloupe, Martinique, Reunion and Mayotte, French Guiana has its own pluriannual energy programming. With an objective of energy autonomy set on the 2030 horizon, they have to accelerate the large-scale clean energy deployment to improve energy access.

How will bioenergy help French Guiana?

Government officials in French Guiana are pushing the proposal as a means to reduce their dependency on fossil fuels for energy. Local officials also hope bioenergy will create much-needed new jobs in the territory which has 26% unemployment.

How much CO₂ does French Guiana produce?

In 2011, CO₂ emissions in French Guiana relative to the electricity production was estimated at 360 GCO₂/kWh which was four times higher than Metropolitan France (Figure 3). The lack of access to energy in the inland areas is a key issue at the heart of French Guiana's pluriannual energy programming.

What is ESA & CNES doing for French Guiana?

ESA, CNES and industrial operators are creating a new chapter in the history of Europe's Spaceport. Together they are using renewable energy as a key component in launchers competitiveness while serving the local community and ultimately French Guiana as a whole.

Can France build a biomass power plant in French Guiana?

As the European Union finalizes its third Renewable Energy Directive (RED III), France is seeking an exemption to enable the European Space Agency and French Space Agency to build and operate two biomass power plants in French Guiana.

Why are environmentalists decrying French Guiana biomass plans?

Environmentalists are decrying the French Guiana biomass plans -- and French President Emmanuel Macron's passive support of them -- not only for the Amazon deforestation it will cause, but because biomass burned to produce energy has been scientifically shown to release higher levels of carbon emissions than coal.

The Guiana Space Centre, also known as Europe's Spaceport, is located northwest of Kourou in French Guiana, a region of France in South America. Operational since 1968, its proximity to the equator makes it an efficient site for launching spacecraft into ...
