

What is Eddi by myenergi?

Maximise your self-generated solar or wind power with eddi by myenergi. Divert excess energy to your heating systems for efficient, green energy use at home.

Can a CT be wired to a myenergi device?

Page 11 Page 11 of 33... CTs can be wired to any myenergi device with CT inputs (e.g. eddi, zappi or harvi). This enables very flexible installation as the CT can be wired to the nearest device. Note: The harvi device can be used if it is not practical to connect any CT to the eddi.

How much energy does the Eddi consume?

2. On the app's home screen, the Eddi is showing as consuming surplus energy at a rate of 1.4kW, but on the graph screen, the 'Consumed gen.' is zero. Under the lower graph, the Eddi is shown as having used 3.5kWh and Home 4.7kWh. This totals to the same (8.2kWh) as Imported + Exported under the top graph.

Does Eddi have a relay & sensor board?

Relay & Sensor Board eddi has the option to install a Relay & Sensor Board (available separately). This allows for many different wiring configurations and includes the economy tariff etc.) Two temperature sensor inputs (PT1000) The two relays can be independently set for several different functions, or they can be set to operate as a pair. The relay

Eddi is a solar power diverter that helps you max out your self-generated power instead of just exporting it back to the grid. The MyEnergi Eddi Solar Diverter not only optimises energy usage, but also contributes to a more sustainable lifestyle. Other features include: 3.68KW / 16A max. heater load; Standby power consumption: 3W; Integral ...

Bring an eddi into your home and you can maximise the consumption of the 100% green energy generated from your solar PV or wind generation system. Rather than giving excess electricity generation back to the grid as per a standard PV system, with our intelligent eddi power diverter, that extra power generation can be used to power heating ...

My Eddi however, has been problematic. In 2021-2022, we had our house rebuilt to PassivHaus standard and the Eddi was installed alongside an ASHP setup for hot water and modest underfloor heating.

Eddi is a solar power diverter that helps you max out your self-generated power instead of just exporting it back to the grid. The MyEnergi Eddi Solar Diverter not only optimises energy usage, but also contributes to a more sustainable ...

The MyEnergi eddi+ is an advanced 3-phase energy diverter, designed to maximise the use of your self-generated solar or wind power. By diverting excess energy to heat water or power other resistive loads, the eddi+ reduces reliance on the grid, enabling significant savings on energy bills while supporting eco-friendly living.

On the app's home screen, the Eddi is showing as consuming surplus energy at a rate of 1.4kW, but on the graph screen, the "Consumed gen." is zero. Under the lower graph, the Eddi is shown as having used 3.5kWh and ...

Wish list - eddi What features should we add to the eddi? What functions would you like to see? Let us know so we can add them to the future product plans. Please start a new topic for any new suggestions or add your support to an existing suggestion if your idea has already been suggested by someone else.
