

Azuri has combined solar and mobile phone technology to bring power to off-grid customers in emerging rural markets. The pay-as-you-go solar home system provides eight hours of emission-free lighting each day and enough power to charge mobile phones.

Les syst&#232;mes solaires PayGo, l'avenir de l'&#233;lectrification dans les zones rurales des pays en d&#233;veloppement ? Pour rendre l'&#233;nergie solaire rentable pour tous et notamment ...

By efficiently spreading the cost of energy systems over time, and so reducing the economic burden of solar devices, the PAYGo model will support three of "Smiling Through Light"s" central missions: to provide sustainable energy systems; to nurture economic growth; and to raise environmental awareness in Sierra Leone and Africa more widely.

SOLUTION PAYGO. La technologie Pay As You Go (PAYGO) peut aider &#224; acheminer l'&#233;nergie solaire &#224; des millions de personnes partout, par le biais de petits paiements structur&#233;s (Paielement mobile, paielement &#233;lectronique, paielement par carte). Le PAYG est une combinaison innovante de technologie solaire et de finance.

A transformative leap up the energy ladder, the SolarHome 5000+ delivers high-capacity power generation and storage for the modern home. Featuring a 50 watt solar panel and 115 watt hour control box, users can charge mobile devices and run the included television for on-demand connectivity and entertainment.

We sell solar kits that facilitate access to reliable solar energy with rapid installation. The latter intervene in rural areas as substitute equipment within households. They become accessible to everyone via the paygo payment system .

Invest in Pay-As-You-Go (PAYGO) companies that sell or rent solar-enabled products to individual customers and/or businesses on a &quot;pay-as-you-go&quot; basis, which means that customers make regular payments through mobile payments or cash. In cases of non-payment, the service provider can remotely disconnect the service.

Azuri PayGo Energy has combined solar and mobile phone technology to bring clean energy to people living in Sub-Saharan Africa. The pay-as-you-go solar home system provides eight hours of emission-free lighting each day and enough power to charge mobile phones.

Scaling Across Multiple Territories Active Interest o PayGo infrastructure designed to allow rapid replication o Straight forward set up for Distributor o Train-the-trainer model - allows Distributor to scale agent network

o Cloud based information systems allows Distributor access to material and information 24-7

Les syst&#232;mes solaires PayGo, l'avenir de l'&#233;lectrification dans les zones rurales des pays en d&#233;veloppement ? Pour rendre l'&#233;nergie solaire rentable pour tous et notamment dans les zones rurales des pays en d&#233;veloppement, un nouveau business model voit le jour. Camille Mourgues, consultant chez mc2iGroupe nous le pr&#233;sente ainsi que le ...
