

The emergence of eFuels, driven by FuelCell Energy's initiatives, marks a promising step towards more sustainable and efficient energy solutions. By leveraging cutting-edge technologies, FuelCell Energy is paving the way for a future where businesses globally can reduce their carbon footprint while ensuring economic growth.

FuelCell Energy creates solutions designed for your company's unique energy journey through long-term service agreements and energy as a service agreements. ... FuelCell Energy offers flexible energy service agreements that ...

The emergence of eFuels, driven by FuelCell Energy's initiatives, marks a promising step towards more sustainable and efficient energy solutions. By leveraging cutting-edge technologies, FuelCell Energy is paving ...

Fuel cells generate electricity and heat through an electrochemical reaction, contributing to ultra-clean baseload power and providing a backup solution. FuelCell Energy offers a unique decarbonization platform with the ability to ...

At FuelCell Energy, we're helping deliver a more sustainable future by decarbonizing power and producing hydrogen around the world. Our platforms can help businesses and communities ...

GGE has agreed to purchase forty-two 1.4-megawatt upgraded carbonate fuel cell modules from FuelCell Energy to replace existing fuel cell modules at the Hwaseong Baran Industrial Complex fuel cell power platform, the world's largest fuel cell power platform, with all modules expected to ship by the first half of calendar year 2026.

At FuelCell Energy, we're helping deliver a more sustainable future by decarbonizing power and producing hydrogen around the world. Our platforms can help businesses and communities with power generation, carbon capture, hydrogen production, and energy storage.

Down-to-Earth ESG reporting By using plain and clear language, we report in a way that is transparent and accessible to our stakeholders. We report in accordance with the Global Reporting Initiative (GRI) Standards as well as the ...

The restructuring will allow FuelCell Energy to prioritize commercially available technologies to reflect changing market opportunities with an updated strategic plan. The plan involves further expanding the company's Connecticut-manufactured molten carbonate technology to offer distributed power solutions.

Our fuel cell platform is designed to meet the changing energy strategies of growing communities and organizations on their journey to net-zero. ... An energy platform based on fuel cell technology. ... affordable, and clean solutions to ...

DANBURY, Conn., Aug. 22, 2024 (GLOBE NEWSWIRE) -- FuelCell Energy, Inc., (Nasdaq: FCEL), a global leader in sustainable energy technologies for the delivery of energy and emissions management, announced that a \$5.9 million CAD grant from Natural Resources Canada's Clean Fuels Fund (CFF) will finance two projects utilizing its electrolyzer ...

We design, manufacture, undertake project development, install, operate and maintain megawatt-scale fuel cell systems, serving utilities, industrial and large municipal power users with solutions that include both utility-scale and on-site power generation, carbon capture, local hydrogen production for transportation and industry, and long ...

The restructuring will allow FuelCell Energy to prioritize commercially available technologies to reflect changing market opportunities with an updated strategic plan. The plan involves further ...

GGE has agreed to purchase forty-two 1.4-megawatt upgraded carbonate fuel cell modules from FuelCell Energy to replace existing fuel cell modules at the Hwaseong Baran Industrial ...

FuelCell Energy offers the only known platform that can capture carbon from an external source and produce more power and hydrogen at the same time. The fuel cell's power generation during the carbon capture process improves ...

FuelCell Energy offers the only known platform that can capture carbon from an external source and produce more power and hydrogen at the same time. The fuel cell's power generation during the carbon capture process improves overall economics.
