

Fusebox offers fully automatic Virtual Power Plant (VPP)-as-a-service software with Energy Management System (EMS) capabilities to help power utilities make rapid decisions and influence the behavior of the assets to balance consumption and production from scattered resources and integrate intermittent renewables.

As the leading demand response provider in the region, we work with an amazing variety of clients, from battery and PV park owners to cold storages, commercial buildings, and big industrial players like cement factories, pellet plants, and crushers. Our mission? To keep bringing the most reliable and innovative energy solutions to all of them.

Fusebox Energy is headquartered in Tallinn, Estonia. What is the size of Fusebox Energy? Fusebox Energy has 21 total employees. What industry is Fusebox Energy in? Fusebox Energy's primary industry is Business/Productivity Software. Is Fusebox Energy a private or public company? Fusebox Energy is a Private company. What is Fusebox Energy's ...

Fusebox is building virtual power plant layers globally and trades the flexibility of electricity consumption to energy markets and balancing services. Fusebox also delivers necessary technology and know-how for local companies who have the necessary flexibility or have access to the flexibility through their existing client portfolios.

Use our energy storage management features for lucrative energy arbitrage, ancillary services (FCR, aFRR, mFRR), or simply cover local consumption. Fusebox software automates collaboration among local production and consumption assets, while staying within grid connection capacity.

Eneco and PKO VC invest in Fusebox, a pioneer in the field of developing software for demand-side response. Fusebox has raised EUR2.5m in a seed+ funding round led by Eneco. Fusebox is an Estonian green tech company with a mission to enable a ...
