

Where can I find information about Energia del Pacifico?

To learn more, please visit the Energia del Pacifico website. View our Cookie Policy. This facility brings critical energy infrastructure to El Salvador to meet the country's energy demand.

Who owns BW Tatiana?

BW Tatiana is jointly owned by BW Gas and Invenergy Investment Company. It is the first ever Floating Storage and Regasification Unit (FSRU) deployed in El...

How has EDP impacted El Salvador?

The project has also been a catalyst for job creation and growth in the country. EDP employed 2,000 workers during peak construction and created 80 full-time operations jobs. In total, the project represents an approximately \$1 billion investment in El Salvador.

How much money is invested in El Salvador?

In total, the project represents an approximately \$1 billion investment in El Salvador. At least \$10 million will be invested in economic and social works during the term of the power purchase agreements, strengthening local communities with a more than \$500,000 investment per year.

The package has a 15-year contractual term granted to FSRU in El Salvador. The funds provide valuable resources for the purchase and conversion of the BW Tatiana LNG carrier to an FSRU. This will be Central ...

El Salvador has imported its maiden LNG cargo in early April when Shell shipped roughly 0.06 million tons of super-chilled gas to FSRU Tatjana near the Port of Acajutla. The permanently moored FSRU was built for exclusive use by the 378 MW Energía del Pacífico power plant and is jointly owned by BW LNG and Invenergy Investment.

BW Tatiana is Central America's first floating storage and regasification unit (FSRU), lynchpin of liquefied natural gas (LNG)-to-power project that will meet 30% of El Salvador's energy...

As a regional leader in geothermal energy, El Salvador currently derives 25% of its national energy from geothermal sources. With plans to expand its geothermal capacity by 2030, including new plants in the eastern region and optimization of existing facilities, the country is positioned to continue its role as a model for renewable energy ...

Representantes del gobierno de El Salvador participaron en la 68° Conferencia General de la Organismo Internacional de Energía Atómica (IAEA por sus siglas en inglés), ...

EDP is a transformative investment in El Salvador's clean energy future. The project is delivering approximately 30% of the country's energy demand with clean power and has modified the Salvadoran energy matrix by incorporating natural gas for generation and other uses, reducing the country's reliance on diesel and heavy fuel oil-fired ...

En ese panorama, AES El Salvador, por medio de la División Soluciones, diseñó y construyó para la empresa Green Planet Energy una nueva planta solar de 4.10 megavatios (MW) de energía ...

BW Tatiana is the first-ever Floating Storage and Regasification Unit (FSRU) deployed in El Salvador, with a capacity of 280 MMSCFD and storage capacity of 137,000 m3. The vessel will be part of the Acajutla FSRU project which is built for exclusive use by Energía del Pacífico ("EDP"), a 378MW combined-cycle generation plant in the country.

According to Invenergy, the project represents the country's largest ever private foreign direct investment and is providing power to meet up to 30 percent of El Salvador's energy demand. The project includes a 380-megawatt (MW) natural gas-fired power plant, the 137,000-cbm BW Tatiana FSRU, and a 1.8-km subsea pipeline that connects the ...
