

Why did GAC buy progressum energy developments?

GAC has reached an agreement with previous owner Progressum Energy Developments (PED), and will pay over EUR400 million for a portfolio that will help the company to strengthen its position in the international renewable energy and energy storage market. With this transaction, the GAIF fund's investments now exceed 800 megawatts.

What does GAC stand for?

Independent alternative asset manager Green Arrow Capital (GAC) has announced the acquisition of a portfolio of ready-to-build solar PV plants in Spain with a total capacity of 508 megawatts. It is the first international investment by the organisation's Green Arrow Infrastructure of the Future (GAIF) fund, which was launched early last year.

What is GAC NE?

The GAC NE intelligent ecological plant broke ground in September 2017 and has a gross investment of RMB 4.7 billion, a floor area of 470,000 square meters, an overall planned production capacity of 400,000 vehicles per annum, and a first-phase production capacity of 200,000 cars per annum.

How much money does GAC invest?

Together with GAIF's assets, the investments by GAC, which was founded in 2012, are close to EUR1.8 billion, and are divided into three different strategies: clean energy and infrastructure, private equity and private credit.

The operation of a solar photovoltaic plant is based on photons and light energy from the sun's rays. The types of solar panels used in these types of facilities are also different. While solar ...
