

What are the main sources of energy in Gabon?

(October 2009) Energy in Gabon comes from two main sources, fossil-fuels and hydroelectricity. Gabon also relies heavily on oil for its export revenues, exporting both crude oil and petroleum. In terms of its oil reserves, the country is one of the richest in sub-Saharan Africa, ranking 5th after Nigeria, Angola, Sudan, South Sudan, and Uganda.

How much electricity does Gabon produce?

Gabon's total electricity production in 2015 was 199 kilotonne of oil equivalent (ktoe), with 51.7% produced from hydropower sources and 48.2% from fossil fuels. The country's final consumption of electricity was 169 ktoe.

Is biomass a source of electricity in Gabon?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Gabon: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Are stand-alone solar systems a viable solution for remote communities in Gabon?

Yet, as mentioned earlier, the country is heavily forested, which stands in the way of connecting remote communities to the country's main grid. Therefore, with such solar conditions, stand-alone solar systems would be the ideal solution for power generation for these communities in Gabon.

Does Gabon have a hydro generating potential?

According to the African Development Bank (ADB), Gabon has a hydro generating potential that ranges between 5000-6000 MW, yet as many other countries in the region, that potential is still far from being met to its fullest. Table: Gabon's Total Hydro Installed Capacity in MW 2009-2018

Where is Gabon located?

Fossil Fuel Energy Consumption (% of total): Gabon lies on the equator, and located on the far west coast of Central Africa. The country borders 3 countries & the Gulf of Guinea; to the north-west is Equatorial Guinea, to the north is Cameroon & to both east & south is the Republic of Congo, while the Gulf of Guinea is to the west.

The country's two main energy sources are fossil-fuels and hydropower. 51.7% of Gabon's total produced electricity in 2015 were generated from hydro, and 48.2% were from fossil fuels. Gabon relies heavily on oil for both its export revenues & its domestic energy production.

Gabon aspires to a bright future in its energy sector, it could indeed be the first country in the Central African sub-region to produce the energy mix by 2035. To bridge the country's energy deficit, Gabonese authorities

since 2016 are committed and active in ...
