

Solen SA Gabon, a subsidiary of Solen Renewable Dubai, has just launched the construction of the Ay&#233;m&#233; Plaine photovoltaic solar power plant, a locality located some thirty kilometres from the capital Libreville. The future facility will have a capacity of 120 MWp.

Solen SA Gabon had signed a framework agreement with the government of Gabon back in March 2022 to construct a 120-megawatt peak (MWp) solar photovoltaic project in Ay&#233;m&#233; Plaine, a region about 30 ...

With its substantial capacity and strategic importance, this project not only underscores Gabon's dedication to sustainable energy solutions but also promises to significantly augment the region's power supply, thereby supporting both environmental and economic growth.

Solar energy is a major asset to boost the total installed capacity of Gabon. The country is already attracting IPPs such as the French company Total Eren, which wants to produce a 50 MWp solar power plant near the capital Libreville.

The Gabonese authorities have just signed a framework agreement for the construction of a 120 MWp solar photovoltaic plant. The facility, which will be located in Ay&#233;m&#233; Plaine, will be commissioned in two phases for ...

The Gabonese authorities have just signed a framework agreement for the construction of a 120 MWp solar photovoltaic plant. The facility, which will be located in Ay&#233;m&#233; Plaine, will be commissioned in two phases for the public power company.

The project is expected to power 300,000 homes and create 150 direct jobs. The plant, announced in 2021, faced delays and reductions in funding after construction began in August 2022. Initially planned as a 120 MW project split into two 60 MW phases, it was scaled back during development.

Solen SA Gabon had signed a framework agreement with the government of Gabon back in March 2022 to construct a 120-megawatt peak (MWp) solar photovoltaic project in Ay&#233;m&#233; Plaine, a region about 30 kilometres from the capital Libreville.

Under the leadership of the President of the Transition, the company Solen, leader in the field of renewable energies, announces the completion of the largest solar power plant, to date, in Central Africa.

We show the alternative and nuclear energy use as percent of the total energy use in Gabon. It consists of noncarbohydrate energy that does not produce carbon dioxide when generated and includes hydropower and nuclear, geothermal, and solar power.
