

Equatorial Guinea is seeking foreign investment to make the nation a trade hub for gas in the region, including with Cameroon and Nigeria. The Gas Mega Hub initiative set down by the government looks to develop and expand onshore processing infrastructure, with additional hubs throughout the region to offtake gas from stranded reserves on the ...

In Ghana, we hold the first virtual pipeline license and have signed an agreement to deliver up to 50 mmscf/d of natural gas from our portfolio through the West African Gas Pipeline to support power generating companies. In Equatorial ...

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC [1] data.

Equatorial Guinea: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.
