Is Freyr battery a vertically integrated company?

FREYR Battery, Inc. (NYSE: FREY) recently announced a strategic pivot from producing battery cells to producing solar modules, having the ambition to become a vertically integrated company also producing solar cells in the U.S. It will achieve this by acquiring the U.S. assets of Chinese solar panel manufacturer Trina.

When will Freyr's solar plant start production?

The facility is expected to ramp up to full production in 2025 with 30% of capacity already contracted with U.S. customers. Freyr reports that this is the first step in its plan to build out a vertically integrated domestic manufacturing footprint that will next include a 5 GW solar cell facility.

Who owns Trina Solar?

From pv magazine USA Freyr Battery, a U.S.-based battery manufacturer has agreed to acquire the U.S. solar manufacturing assets of Trina Solar for \$340 million. The manufacturing assets include a 5 GW, 1.35 million square foot solar module manufacturing facility in Wilmer, Texas, that started production this month.

Is Freyr's pivot to solar energy a prospect to approach cautiously?

Adding uncertainty to the incoming administration's policies and the glut in solar production equipment, FREYR's pivot to solar energy looks like a prospect to approach cautiously. I will watch from afar. Income-oriented individual investor focusing on building a solid dividend portfolio within oil and gas, shipping, energy, and minerals.
