

The Glassenbury battery storage park, a 40MW storage project in Kent, was successfully awarded contracts in the National Grid's Enhanced Frequency Response (EFR) tender process and the Capacity Market Auction during 2016.

Gresham House Energy Storage Fund plc (LON:GRID) said today it has finalised the purchase of the 30-MW/30-MWh Byers Brae battery energy storage system (BESS) in Scotland. The battery storage system in Glassenbury, Kent.

The 40MW battery park in Glassenbury in Kent, south-east England and the 10MW battery park located at Cleator in Cumbria, north-west England, will deliver a quarter of the 200MW capacity secured by National Grid to provide sub-second grid flexibility to increase reliance on low-carbon forms of electricity generation.

Glassenbury, one of Gresham House's UK battery storage projects. Image: Gresham House. Gresham House, a stock exchange-listed investor in battery storage in the UK and Ireland, has said the majority of its development pipeline projects could have at least two hour durations of storage when built.

Gresham House's Glassenbury battery storage system. Image: Gresham House. Octopus Energy has signed a two-year fixed-price tolling agreement with Gresham House Energy Storage Fund for 500MW of its battery assets, bringing the utility's virtual power plant (VPP) portfolio to over 1.5GW.

The 50MW portfolio spans two sites including a 40MW battery park in Glassenbury, Kent and a 10MW battery park in Cleator, Cumbria. The two sites, which use lithium-ion battery models, will provide sub-second responses to surges in energy supply and demand, providing grid flexibility and storage.

Greek industrial group Mytilineos SA said it has energised the 30-MW/30-MWh Byers Brae battery energy storage system (BESS) in Scotland, delivering the project on schedule after a four-month construction period.

Gresham House's Glassenbury battery storage system. Image: Gresham House. Octopus Energy has signed a two-year fixed-price tolling agreement with Gresham House Energy Storage Fund for 500MW of its ...

Gresham House Energy Storage Fund plc said today it has signed a tolling agreement with a unit of renewables group Octopus Energy related to 568 MW/920 MWh of energy storage projects across the UK. The battery storage system in Glassenbury, Kent.

The Glassenbury - Battery Energy Storage System is owned by VLC Energy (100%). The key applications of the project are frequency regulation, renewables capacity firming and renewables energy time shift.

Gresham House's Glassenbury battery storage asset. Image: Gresham House Energy Storage Fund. Gresham House Energy Storage Fund (GRID) is on track to own more than 1.2GW of operational battery energy storage systems after securing a deal to acquire 425MW of projects from Gresham House Devco and expanding its exclusive pipeline by a further 427MW.
