

Saint Vincent and Grenadines receives high levels of solar irradiation (GHI) of 5.2 kWh/m<sup>2</sup>/day and specific yield 4.3 kWh/kWp/day indicating strong technical feasibility for solar in the country.<sup>3</sup> In 2021, 26.67% of the country's power demand was met through renewable sources.<sup>4</sup>

Our smart solar solution is the number one home and business improvement project that pays for itself within 3-5 years, saves you money, increases the value of your property and is environmentally friendly. We help clients save thousands of dollars with our payment plans of little to no upfront cost, hassle free.

This is the Energy Report Card (ERC) for 2022 for St. Vincent and the Grenadines. The ERC provides an overview of the energy sector performance, highlighting the following areas:

- o Installed Conventional and Renewable Power Generation Capacity
- o Annual Electricity Generation, from Conventional and Renewable Plants

Located on Union Island, the 600kW solar PV plant is connected to a 637 kilowatt-hour (kWh) lithium-ion battery, extending its generating capacity to supply all of Union Island's daytime power requirements. The project represents Masdar's first fully implemented grid-connected battery energy storage system.

The Commissioning of the Union Island Solar PV and Battery Energy Storage System on Monday 25th March 2019 has been hailed as a significant milestone in the energy sector of Saint Vincent and the Grenadines.

The Mayreau hybrid generation project is expected to have a significant impact on electricity generation on the island. On site, there are 313 solar panels that will produce conservatively 164,049 kWh(units) of electric ...

A photovoltaic system will be added to the generation mix on Union Island in keeping with a mandate by the Government of St Vincent and the Grenadines (SVG) and St Vincent Electricity Services Limited (VINLEC) to increase the penetration of renewable energy in the production of electricity.

The Mayreau hybrid generation project is expected to have a significant impact on electricity generation on the island. On site, there are 313 solar panels that will produce conservatively 164,049 kWh(units) of electric energy per year which equates to a 28% renewable energy penetration on the island's grid based on recent demands.

Our smart solar solution is the number one home and business improvement project that pays for itself within 3-5 years, saves you money, increases the value of your property and is environmentally friendly. We help clients save ...

## **Green power solar panels St Vincent and Grenadines**

This document presents St. Vincent and the Grenadines" Energy Report Card (ERC) for 2021. The ERC provides an overview of the energy sector performance in St. Vincent and the . Grenadines. The ERC also includes energy efficiency, technical assistance, workforce, training . and capacity building information, subject to the availability of data.

A photovoltaic system will be added to the generation mix on Union Island in keeping with a mandate by the Government of St Vincent and the Grenadines (SVG) and St Vincent Electricity Services Limited (VINLEC) to ...
