

Features: o Charging the battery packs in accordance with PN-EN 50-171 o Operation with and control of BST-980 charge boosters o Monitoring of current leakage in final circuits o Protection against deep discharge o Ability to monitor battery voltage symmetry o Fan control o 3 measuring junctions for o Voltage o Current ...

Features: o Charging the battery packs in accordance with PN-EN 50-171 o Operation with and control of BST-980 charge boosters o Monitoring of current leakage in final circuits o Protection against deep discharge o Ability to monitor ...

The panel is intended for remote status of basic system statuses, such as mains (network) operation, battery operation, defect. Thanks to a built-in key, it is possible to lock the continuous and emergency operation. Such solution protects the system against unauthorized access. FZLV system is intended to cooperate with one PZS module.

The monitoring and power supply systems are a high-tech devices, reliable and easy-to-use central battery systems, constructed in accordance with the requirements of applicable standards and regulations. These systems can ...

The monitoring and power supply systems are a high-tech devices, reliable and easy-to-use central battery systems, constructed in accordance with the requirements of applicable standards and regulations. These systems can monitor circuits and luminaires in a mixed system.

The CBS central power supplysystem is a an advanced, reliable and user-friendly central battery system,designed in compliance with the requirements and all importantstandards. The system provides the possibility of monitoring circuits,luminaires or both.

The LPS is a state-of-the-art, reliable and user-friendly central battery system manufactured by AWEX. It has been designed to meet applicable standards and comprises the proprietary SMART technology. From the functional point of view, the LPS is equivalent to the CBS, however due to

The CBS central power supply system is a an advanced, reliable and user-friendly central battery system, designed in compliance with the requirements and all important standards. The system provides the possibility of monitoring circuits, luminaires or both.

The OUT4F module is a universal output device for operation among electrical devices, fire-fighting system and AWEX's Central Battery system. It is designed to operate with the FZLV II system and supplied from its circuits. The OUT4F module has 4 ...

The LPS central battery system, offered by AWEX, is a small, up-to-date, reliable and simple device. It has been designed in accordance with the applicable standards and with using SMART technology.
