

Where is Luxembourg headed in terms of solar energy?

2. Where do you think Luxembourg is headed in terms of solar energy? As part of Luxembourg's Integrated National Energy and Climate Plan (PNEC), the nation aims to increase its share of renewable energy from 11% as of 2020 to 25% by 2030. The share of electricity generated by solar panels would need to reach 1.112 GWh by 2030.

How much solar energy does Luxembourg use?

Today, solar energy makes up 13% of Luxembourg's energy consumption. To reach the renewable energy target of 25% by 2030, the Grand Duchy has introduced a string of incentives. The aim is to make efforts to protect the climate a profitable investment. How much is the subsidy?

Does Luxembourg need photovoltaics?

Luxembourg has an ambitious target to increase the share of energy from renewable sources to 25% by 2030. The development of photovoltaics is one of the solutions recommended in Luxembourg's integrated national energy and climate plan (PNEC, Predicted No-Effect Concentration).

How do solar panels work in Luxembourg?

In Luxembourg, the main model is that of self-consumption with sale of surplus. To put it plainly: owners of solar panels consume the energy produced by their panels directly. If there is any electricity left over, it is sold back to the grid at a rate set by the government. This system has a number of advantages:

How can Luxembourg encourage the adoption of solar energy?

To encourage the adoption of solar energy, the Luxembourg government has set up a range of grants and subsidies that make the installation of solar panels even more attractive. The programme Klimabonus offers to reimburse up to 62.5% of the cost of the photovoltaic installation for self-consumption contracts.

Where to install solar panels in Luxembourg?

Ideally, choose a company "Made in Luxembourg" and approved by the Klima agency to install your solar panels. We work with the most serious and reputable companies in Luxembourg for the installation of solar panels. If you would like a quote for your project, request a free quote.

At Green Power Energy, we've installed over 146,000 solar panels over our 15-year history, contributing to the generation of 250 GWh of solar power. That's enough to power about 23,000 average American homes for a year or charge over 8 million electric vehicles with each driving around 1,000 miles.

As part of Luxembourg's Integrated National Energy and Climate Plan (PNEC), the nation aims to increase its share of renewable energy from 11% as of 2020 to 25% by 2030. The share of electricity generated by solar panels would need to reach 1.112 GWh by 2030.

Residents of Luxembourg can currently benefit from 62.5% state support when installing solar panels, a policy in place until 1 July 2024. Since early 2024, the Socom company has been producing solar panels in ...

We believe in forging deep connections between communities and their green power. We are buying green power from one-third of the community energy sector, from over 250 Power Purchase Agreements. Through these energy projects, locals own and run their own green generation, and profit is reinvested in local charity or environmental initiatives.
