

Does Grenada have solar power?

Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day. A 2- to 4-MW PV installation is planned, but no utility-scale solar plants are currently in operation.

How much does solar cost in Grenada?

According to data from 2014, the costs of utility-scale solar in Grenada are estimated to be between \$0.21/kWh and \$0.44/kWh; wind costs are estimated to be between \$0.05/kWh and \$0.20/kWh.

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

provided to third party executing agencies through Recipient-executed trust funds (RETFs). ... by either the BETFs or RETFs ...

Grenada's clean energy goals for increasing energy efficiency and implementing renewable energy from geothermal, wind, and solar technologies are matched by its renewable resources, which more than exceed current electric sector capacity. Several policies and programs have been implemented to help meet those goals, including:

C.P. Land Public Company Limited is committed to conserving energy and using renewable energy. The company is focused on promoting solar electricity, a clean form of energy that does not cause negative impacts on the environment, and encouraging opportunities for communities to learn and understand the applications of clean energy.
