Lightwork Power Caribbean is based in Grenada and we design and install systems that are designed with all the Caribbean considerations, codes and characteristics in mind. Quality equipment installed by our qualified electricians with zero shortcuts.

Grenlec recently finalised a contract for 937kW of solar photovoltaic (PV) renewable energy spread over 13 sites at an aggregate capital cost of more than EC\$6.4 million. These new installations represent Grenlec's single largest renewable energy project investment in Grenada to date.

With our proven track record and attention to detail, we ensure smooth project execution, optimized system performance, and timely delivery. Trust us to be your reliable partner in achieving successful solar integration, while you focus on your core business goals.

Potential for Grenada . Solar Photovoltaic (PV) A solar electric system converts sunlight into electricity using solar cells. Solar panels can be mounted on rooftops or the ground, and convert particles of light energy, known as photons, into direct current (DC) electricity.

Call for Proposals: Solar-Powered Green Air Conditioning March 5, 2021 . Featured Projects. Driving Solutions for a Sustainable Future. ... This portal was developed under the Getting Grenada Green Climate Fund Ready (3G) Project; co-funded by the Green Climate Fund, the German Federal Ministry for Economic Cooperation and Development and the ...

Off-grid solar systems are a popular choice in Grenada, which has abundant sunshine all year round. Off-grid solar systems are not connected to the main electricity grid, so they can provide a reliable source of power even in remote areas or during power outages.
