

Does Grenada have solar power?

Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day. A 2- to 4-MW PV installation is planned, but no utility-scale solar plants are currently in operation.

How much does solar cost in Grenada?

According to data from 2014, the costs of utility-scale solar in Grenada are estimated to be between \$0.21/kWh and \$0.44/kWh; wind costs are estimated to be between \$0.05/kWh and \$0.20/kWh.

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

Why should you choose infinisolar solar inverter?

The quality of solar products such as the Infinisolar inverter is outstanding, and they offer excellent cost-effectiveness. With over 20 years of experience in inverter production and manufacturing, Infinisolar is dedicated to providing affordable green electricity to people around the world and contributing its efforts to the cause.

What is the potential of geothermal power in Grenada?

Geothermal studies reveal a potential of approximately 50 MW of baseload power; two 20-MW geothermal projects have similarly stalled in development. Solar photovoltaics (PV) have high potential on Grenada because the country's global horizontal irradiation exceeds 5 kWh/square meters per day.

Who owns the electricity in Grenada?

Utility investors: 50% with U.S.-based WRB Enterprises; the public holds 25%; and the government, its employees, and the National Insurance Scheme Grenada hold the remaining 25%. Nearly 99% of electricity is sourced from diesel fuel. The utility maintains an installed capacity of 48.6 MW spread across the three islands.

A solar electric system converts sunlight into electricity using solar cells. Solar panels can be mounted on rooftops or the ground, and convert particles of light energy, known as photons, into direct current (DC) electricity. An inverter changes DC power into alternating current (AC) to power your home or facility. Solar is a proven technology.

Lightwork Power Caribbean is based in Grenada and we design and install systems that are designed with all the Caribbean considerations, codes and characteristics in mind. Quality equipment installed by our qualified

electricians with zero shortcuts.

Solar energy is a rapidly growing source of renewable energy in Grenada, a Caribbean island nation. The country has abundant sunshine and relatively low solar panel costs, making it a prime location for solar development.
