

Grenada is targeting 100% renewable energy in electricity and transport sectors by 2030. Diesel accounts for the majority of Genlec's generation, providing 50MW from 15 units. There is also 3.6MW of customer-sited solar PV alongside 1.1MW of Genlec-owned solar PV.

The Grenada Utilities Regulatory Commission is inviting expressions of interest for a 15.1 MW solar power project at Maurice Bishop International Airport, potentially including a 10.6 MW/21.2 MWh battery energy storage system (BESS). The selected developer will handle project development, operation, and maintenance for 25 years.

The Grenada Utilities Regulatory Commission is inviting expressions of interest for a 15.1 MW solar power project at Maurice Bishop International Airport, potentially including a 10.6 MW/21.2 MWh battery energy ...

The project aims to increase Grenada's reliance on renewable energy and reduce its dependence on fossil fuels. PURC is seeking an independent power producer (IPP) to develop and operate either a 15.1MW standalone solar PV plant or a solar-plus-storage plant combining 15.1MW of solar PV and a 10.6MW/21.2MWh battery energy storage system (BESS).

The Grenada Utilities Regulatory Commission is inviting expressions of interest for a 15.1 MW solar power project at Maurice Bishop International Airport, potentially including ...

A solar electric system converts sunlight into electricity using solar cells. Solar panels can be mounted on rooftops or the ground, and convert particles of light energy, known as photons, into direct current (DC) electricity. An inverter changes DC power into alternating current (AC) to power your home or facility. Solar is a proven technology.

The Public Utilities Regulatory Commission (PURC) is thrilled to announce the launch of a new program for Small Scale Independent Power Producer (SSIPP). This latest call comes on the heels of the finalisation of the pilot program initiated in 2021 where nine (9) local individuals will receive their licenses to operate

Off-grid solar systems are a popular choice in Grenada, which has abundant sunshine all year round. Off-grid solar systems are not connected to the main electricity grid, so they can provide a reliable source of power even in remote ...

Grenada's Public Utilities Regulatory Commission is seeking expressions of interest for 15.1 MW of solar at Maurice Bishop International Airport. The project may also include a 10.6 MW/21.2 MWh...

Off-grid solar systems are a popular choice in Grenada, which has abundant sunshine all year round. Off-grid

solar systems are not connected to the main electricity grid, so they can provide a reliable source of power even in remote areas or during power outages.
