

What is the supply voltage in Grenada?

In Grenada the supply voltage is 230V. If the appliance is a single voltage rated appliance, it will need to operate at the same voltage as the supply voltage of the country i.e. 230V. If this is not the case it should be used alongside a voltage transformer or converter to allow the appliance to work safely and properly.

What does Dana do at Voltus?

Previously, as Chief Product Officer, Dana led the development of Voltus's technology-enabled distributed energy resource platform, which connects Voltus's customers and technology partners to the value that they can extract from their local energy markets, while contributing to a more resilient and decarbonized electric grid.
