In 2023 Guernsey Electricity worked in conjunction with The Little Green Energy Company to install the vast community-scale solar array at Grow Limited's newly redeveloped headquarters. The 310 photovoltaic (PV) panels will produce 129-kilowatt peak power (kWp). That's enough electricity to supply power to approximately 35 homes.

I'm in conversation with EnergyPal and noticed that tools they use to generate the power output and also options are much better compared to others. Unfortunately they are offering Aptos panel but with Nem 2.0 sunsetting might go with them to lock in the rate. I was hoping for Rec or SunPower since they are much better I have read.
