

Where is Guyana's second mega-scale solar farm located?

The Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over 163 kWp of solar PV capacity and 800 kWh of battery energy storage.

How much solar energy is available in Guyana?

As of 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW, with an estimated annual generation of 7.16 GWh. Solar energy is used for several purposes in Guyana, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas.

How many solar PV farms will Guyana have?

Guyana Power and Light Inc. (GPL) is preparing plans for three utility-scale solar PV farms totaling 30 MW for the national grid in the long term, as well as a 0.75 MW Solar PV Farm at Wakenaam and a 4 MW Solar PV Farm at Onverwagt in the near future.

Is Guyana a good place to install solar PV?

Most locations across Guyana have excellent solar insolation levels and are ideal for solar PV generation. As of 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW, with an estimated annual generation of 7.16 GWh.

How many solar homes are distributed in Guyana?

The GEA supported the implementation of a massive electrification project to supply, deliver, and distribute 30,000 solar home energy systems to hinterland and riverine communities in Guyana. A total of 26,398 units were distributed as of December 2023.

What does the Guyana Energy Agency do?

The Guyana Energy Agency continues to support national efforts in transforming the country's sustainable low-carbon pathway and the energy sector, as it contributes to providing cleaner, affordable energy access for all, as well as promoting energy efficiency and conservation practices.

The Guyana Power and Light Inc. (GPL) is a vertically integrated state-owned public utility that generates electricity in most of Guyana along the coast. GPL operates several grids, the ...

The Guyana Utility Scale Solar Photovoltaic (GUY SOL) Programme will help Guyana to achieve the mission set out in its Low Carbon Development Strategy 2030, by reducing the amount that the ...

The GUY SOL programme, a collaboration between GPL and SUMEC Group, aims to implement utility-scale photovoltaic projects to enhance Guyana's energy sustainability. Under this initiative, 80-megawatt solar PV

farms and battery storage systems will be installed in Regions 2, 5, and 6.

As at 2018, the total installed capacity for Solar PV in Guyana is 4.63 MW with an estimated annual generation of 7.16 GWh. In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas.

The first 1,830 solar photovoltaic (PV) home systems which form part of the "30,000 solar PV home systems" initiative are set to arrive in July. Chief Executive Officer of the Guyana Energy Agency (GEA), Dr. Mahender Sharma, made the announcement at the multistakeholder consultation on the presentation of Guyana's Second Voluntary ...

scale solar PV projects. This component will finance: (i) a capacity building program for public utility operators which includes: (a) simulation and modeling for the interconnection of variable ...

Guyana's solar capabilities are set to receive a significant boost with the signing of a US \$38 million contract between the Guyana Utility-Scale Solar Photovoltaic (GUYSOL) and a Chinese company known as SUMEC to construct solar farms in Regions Two, Five and Six.

The GUYSOL programme, a collaboration between GPL and SUMEC Group, aims to implement utility-scale photovoltaic projects to enhance Guyana's energy sustainability. Under this initiative, 80-megawatt solar PV ...

scale solar PV projects. This component will finance: (i) a capacity building program for public utility operators which includes: (a) simulation and modeling for the interconnection of variable RE technology to the national grid; (b) planning, design, tendering and evaluation of solar PV proposals; (c) system operation, demand

Guyana's solar capabilities are set to receive a significant boost with the signing of a US \$38 million contract between the Guyana Utility-Scale Solar Photovoltaic (GUYSOL) and a Chinese company known as SUMEC to construct solar farms in Regions Two, Five and Six. The projects are being funded

The Government of Guyana commissioned its second mega-scale solar farm, the 1.5 MW utility-scale solar PV plant at Bartica, Region Seven (Cuyuni-Mazaruni) in March 2023. At 22 off-grid locations, GEA installed over 163 kWp of solar PV capacity and 800 kWh of battery energy storage.

The Guyana Power and Light Inc. (GPL) is a vertically integrated state-owned public utility that generates electricity in most of Guyana along the coast. GPL operates several grids, the Essequibo Coast Isolated System which covers Region 2, the Bartica Isolated System which covers portions of Region 7, the Wakenaam Isolated System and the Leguan
