

The GUYSQL programme, a collaboration between GPL and SUMEC Group, aims to implement utility-scale photovoltaic projects to enhance Guyana's energy sustainability. Under this initiative, 80-megawatt solar PV farms and battery storage systems will be installed in Regions 2, 5, and 6.

Solar power works by converting light from the sun into electricity. This electricity can then be used in your home or exported to the grid when it's not needed (Soon to be available in Guyana). This is done by installing Solar Panels on your roof ...

Guyana's solar capabilities are set to receive a significant boost with the signing of a US \$38 million contract between the Guyana Utility-Scale Solar Photovoltaic (GUYSQL) and a Chinese company known as SUMEC to construct solar farms in Regions Two, Five and Six.

Solar Direct offers the most flexible off-grid and hybrid Solar PV systems on the Guyana market to meet the budget and needs of our clients. No job is too small or too big for us as we cater for both residential and commercial applications. We currently offer three solar power packages and can also customise systems specifically for you!

In Guyana, solar energy is used for several purposes, including drying agricultural produce, irrigation, ICT, and to improve electricity access in rural areas. Under the Hinterland Electrification Programme, in excess of 19,000 solar PV systems had been installed in ...
