

How much does a 5 kW solar system cost?

As of January 2022, the average cost of solar in the U.S. is \$2.776 per watt (\$13,850 for a 5-kilowatt system). That means the total 5 kW solar system cost would be \$10,249 after the federal solar tax credit (not factoring in any additional state rebates or incentives). 5 kW solar panel prices: What are homeowners paying in your state?

How much electricity does a 5 kW solar system use?

The cost of electricity where you live is the biggest determinant of your solar savings. The table below shows the average estimated electricity production numbers for 5 kW solar energy systems in cities across the U.S. By comparison, the average household in the U.S. uses 893 kilowatt-hours (kWh) a month, which equals 10,715 kWh per year.

How much does a solar installer cost?

A recent report by the U.S. government found that large installers are \$2,000 to \$5,000 more expensive than small solar companies. If you have offers from some of the big solar installers, compare those bids with quotes from local installers to ensure you don't overpay for solar.

How much electricity do solar panels produce?

The amount of electricity your solar panels produce depends on many factors, including the direction and angle of your roof. The most important one is how sunny it is where you live - for example, a 5 kW system in Las Vegas makes about 30 percent more electricity in a year than one in Philadelphia.
