Will Halmahera deliver MHP to Chinese clients in Q2 2021?

Halmahera aimed to deliver its first shipment of mixed hydroxide precipitate (MHP) to Chinese clients in Q2 2021 and to test the second phase of nickel sulphate production in early 2022. The Harita Group has signed offtake agreements with Beijing Easpring and GEM for nickel and cobalt sulphate products produced at Halmahera.

Who is Halmahera resources?

HalmaheraResources.com takes pride in being a leading low-cost producer of nickel that generates sustainable prosperity for our employees, investors, and the communities in which it operates. Its primary objective is producing high-grade nickel at its Halmahera Project in South Halmahera Regency, North Maluku Province, Indonesia.

When will Halmahera start production of nickel sulphate?

Development of the operation would be in two phases. Halmahera aimed to deliver its first shipment of mixed hydroxide precipitate (MHP) to Chinese clients in Q2 2021 and to test the second phase of nickel sulphate production in early 2022.

How will Halmahera resources convert to carbon-free energy?

Halmahera Resources intends to gradually convert to carbon-free energy during the following years by signing into similar agreements and significantly lowering its GHG emissions. More than 200 generation facilities are part of the energy company that has entered the agreement.

What does the Halmahera Power Purchase Agreement mean?

The action aims to strengthen the corporate environmental policy, which, among other things, calls for a progressive shift in the company's operations toward carbon-free energy. The deregulated bilateral power purchase agreement was established between Halmahera Resources and a local hydropower company.
