An Energy bayonet is a UNSC weapon attachment that is used to counter personnel in close quarters combat. It generally takes the form of a barrel attachment with a blade similar to that of an Energy Sword. ... that the Plasma Rifle in Halo 3 has the same rate-of-fire and damage-per-hit as the Brute Plasma Rifle in Halo 2?...that "Blam!" was the ...

Vacuum energy is an underlying background energy that exists in space throughout the entire universe. One contribution to the vacuum energy may be from virtual particles, particle pairs throughout the universe that blink into existence and then annihilate in a timespan too short to observe. Their behavior is codified in Heisenberg's energy-time uncertainty principle.

The energy stave, also known as the energy pike, is a Covenant melee weapon, consisting of a long metal staff and a bladed tip with a series of glowing panels. Different variants of the energy stave are used for both practical and ceremonial purposes. Despite their appearance generally lacking the distinct plasma blades of energy swords and their cousins, energy staves (as their ...
