

High-energy solar generator for home use

What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

We've tested several models, and the Jackery Solar Generator 2000 Pro is our favorite solar generator. The portable power station component is the Jackery Explorer 2000 Pro and the solar panels are the Jackery Solar Saga 200 panels, our favorite portable solar panels.

Can a rechargeable solar generator power a house?

Generally speaking, a rechargeable solar generator won't be able to power your entire house if you lose power. With that said, even a smaller generator can be used to power key devices or appliances, sometimes for days at a time depending on its power consumption.

Which solar powered generator is right for You?

If you need something portable for a camping trip, then the Jackery 500W might be your best new travel buddy. When deciding what solar powered generator is right for you, consider which types of appliances, tools, and devices you need to charge and how often you'll be without a traditional power source.

What is a solar generator?

Solar generators are smaller-scale versions of whole-house solar panels and batteries. Portable power stations have been available for a while now and using home solar panels to charge on the go is the next logical step. Combine portable power stations with portable solar panels and you have yourself a solar generator.

Here's our recommendation: if you plan to use the solar generator very often, a LiFePO4 solar generator will have a longer lifespan. But if you only plan to use the solar generator ...
