High voltage bms Sri Lanka

Single over-discharge protection voltage: 2.50V ± 0.1V (2.50-3.0V/0.05V per upgrade) Single over-discharge recovery voltage: 2.80V ± 0.1V Protection Current consumption: <=300UA

Applicable scope: Suitable for lithium batteries with a nominal voltage of 3.7V and full voltage of 4.2V (including 18650, 26650, polymer lithium batteries, without limitation on the dimensions) Product Size: 45*15*3.4mm (Standard) Charging voltage: 8.4V - 9.0V

JK BMS is an advanced battery management system designed for use in lithium iron phosphate (LiFePO4) battery packs. It features a high current rating of 150A and a balance current of 2A, making it suitable for high ...

1PCS 1S 3.7V 3A BMS PCM 18650 Lithium Battery Protection Board. Features: High-accuracy voltage detection circuit; The terminal of the charger using high voltage device; Built-in three-stage over-current detection circuit (over-current 1, over-current 2, load short circuit); MOS transistor can control the battery charge and discharge; Parameter:

1PCS 1S 3.7V 3A BMS PCM 18650 Lithium Battery Protection Board. Features: High-accuracy voltage detection circuit; The terminal of the charger using high voltage device; Built-in three ...
