

Fortescue Metals"s green energy unit has bought a 60% stake in Dutch-based renewable firm High yield Energy Technologies (HyET) Group in a bid to cut costs and boost green energy production. "HyET Hydrogen"s technology will support ...

Fortescue Metals Group Ltd (FMG.AX) ?????????,??????????????? High Yield Energy Technologies (HyET) Group 60% ???,???????????????????

Australian based Fortescue Future Industries (FFI) has acquired a 60 per cent stake in Dutch based High yield Energy Technologies (HyET) Group and provided the majority share of financing for the expansion of HyET Solar"s Dutch Solar PV factory.

The companies that form part of the HyET group create technologies that enable commercially viable, large scale access to decentral renewable energy sources. The primary objective of the HyET group is to develop a sustainable and profitable business based on the above objective.

Fortescue Metals Group Ltd (FMG.AX) ?????????,??????????????????? High Yield Energy Technologies (HyET) Group 60% ???,?????????? ...

The two key technologies under development are high differential pressure AEM electrolyzers and high temperature proton conducting solid oxide electrolyzers. Both these technologies reduce ...

The two key technologies under development are high differential pressure AEM electrolyzers and high temperature proton conducting solid oxide electrolyzers. Both these technologies reduce the CAPEX and OPEX of green hydrogen production.

HyET (High Yield Energy Technologies) NoCarbon is a fast growing energy technology start-up, focusing on the development of low cost, energy efficient electrochemical and thermochemical systems for decarbonization of our chemical and energy infrastructure. The technologies in our portfolio include, low temperature electrochemical capture and utilization of carbon dioxide, ...

The companies that form part of the HyET group create technologies that enable commercially viable, large scale access to decentral renewable energy sources. The primary objective of the HyET group is to develop a sustainable and ...

Australian based Fortescue Future Industries (FFI) has acquired a 60 per cent stake in Dutch based High yield Energy Technologies (HyET) Group and provided the majority share of financing for the expansion of HyET

Solar"s Dutch Solar ...

Anglo American Platinum announces its investment alongside Shell Technology Ventures (STV) in High-Yield Energy Technologies (HyET), a Dutch company that has developed electrochemical hydrogen compression (EHC) technology that will support ...

High-Yield Energy Technologies specializes in electrochemical hydrogen compression within the renewable energy sector. The company provides hydrogen compressors designed for various applications, including building heat and power, as well as transport and mobility.
