In the winter months electricity from APS is nearly free during peak solar hours, and with super cooling in the summer, I'm able to escape nearly all demand charges. I had actually signed an install contract that fell through due to some unusual roofing issues, and I am glad it did -- it's a shame APS does so much to disincentivize solar.

Fuses shall be sized based on final solar panel selection in accordance with the NEC. o PV circuit breakers in electrical panel shall be rated as suitable for backfeed. Circuit ... inverters, and energy production as outlined in APS Solar PV Design Guidelines. PV panel installation must be coordinated with Structural, Roofing, and other ...
