

Are solar leases and PPAs a scam?

No, not all leases and PPAs are scams. However, they seem to be a breeding ground for deceptive and predatory practices, including the old "government is paying people to go solar" scam. Related reading: Solar Leases vs. Solar Loans vs. Solar PPAs

Are solar companies a bait and switch scam?

This is essentially a classic bait and switch scam. A solar company uses the premise of getting 30% off solar to get homeowners to sign a lease or PPA, and then collects it for themselves. In extreme cases, solar scammers may even pose as utility or government officials trying to promote a new or unique solar program in your area.

Are solar panels a risk to roof integrity?

Solar panels, typically mounted on rooftops to maximize sunlight exposure, are often misconceived as a risk to roof integrity. However, there's minimal risk of damage with a professional and experienced installer. Qualified solar companies assess your roof's condition before installation and use expert techniques to prevent leaks and other damage.

Are homeowners paying for solar panels in a lease or PPA?

In short, free solar panel ads are typically for leases and power purchase agreements (PPAs). These arrangements are basically long-term solar system rentals in which the solar company owns the panels and homeowners pay a monthly fee in lieu of their electricity bill. So, are homeowners technically paying for solar panels in a lease or PPA? No.

Are solar panels eco-friendly?

Solar panels offer a low-maintenance solution for sustainable energy. While harnessing solar energy is a green initiative, some people worry about the eco-friendliness of solar panel production. However, solar panels often offset the energy used in their manufacture within one to four years of operation.

Do solar panels have a lien on a property?

A lien may be attached to the property for homes with leased solar panels, potentially affecting its market appeal. The attractiveness of such homes to buyers will largely depend on their valuation of renewable energy. Many homeowners feel anxious about the upfront cost of installing solar panels.
