

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

Is going solar a scam?

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. Here's how to steer clear of the scams: Do some research.

How do you know if a solar system is a scam?

Ask for a list of satisfied customers and look at customer reviews online. Know that the government won't offer you free solar. The federal government does not install residential solar panels for free; if someone is claiming otherwise, it's probably a scam. If it seems too good to be true, it probably is.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

Are rooftop solar panels a scam?

While rooftop solar panels are becoming increasingly ubiquitous in homes throughout the United States, the industry also has a more sinister side: a seemingly widespread problem of fraudulent business practices that has cast a shadow over many solar panel companies.

Are home solar panels a good idea?

Home solar panels can help some households save money on energy-- but be careful if a solar panel salesperson knocks on your door or calls without warning. There are plenty of reputable companies who can install solar panels or help you make other clean energy improvements to your home.

Solar panel scams target homeowners interested in installing solar energy systems. They involve scammers making false promises or tricking you into paying for services you'll never receive. Recently, the FTC also ...

Solar PV isn't much help with winter power peaks. The bulk of solar generation is between 11am and 3pm. Solar panels also generate considerably more power in the summer, when the days are longer and the sun is higher in the sky. To get ...
