

What kind of batteries can I recycle in Canada?

Recycle Your Batteries,Canada! manages the collection and recycling of single-use and rechargeable dry-cell household batteries(weighing up to 5 kg each). This includes e-mobility batteries used on devices such as e-bikes and e-scooters. Not sure what type of batteries you have? Continue reading to learn more.

Why should Canadians recycle household batteries?

By properly recycling household batteries,Canadians can divert batteries from landfill,and help reclaim rare metals,so they can be re-used to make new products. This reduces the need to mine new raw materials and helps build a strong circular economy. We have over 12,000 household battery drop-off locations across Canada.

How much does a lithium battery cost in Canada?

In order to buy the best lithium battery in Canada,including lithium-ion batteries,12V LiFePO4 batteries,and deep cycle solar batteries,which are the most common type of battery used in energy storage systems,it typically costs between \$800 and \$1000 per kilowatt-hourof storage capacity.

What types of batteries are available?

9 Volt Batteries AA Batteries AAA Batteries Battery Chargers & Accessories C Batteries D Batteries Rechargeable Batteries Sealed Lead Acid (SLA) Batteries Specialty Batteries

What type of batteries are used to make batteries?

Lithium Ion(Li-Ion) batteries: The cobalt is used to create new lithium-based batteries. Small Sealed Lead Acid (SSLA/Pb) batteries: The lead is used to make new batteries. Ni-Cd,Nickel Metal Hydride (Ni-MH) and Nickel Zinc (Ni-Zn) batteries: The nickel is used in stainless steel products. Why is it so important to recycle batteries?

Why is household battery recycling important?

Household battery recycling is increasingly recognized as a crucial part of Canada's net-zero transition and plays a key role in reducing potentially hazardous waste and protecting the environment. Recycling batteries is essential,as the chemical and metal components may harm the environment if they're thrown away and end up in landfills.
