

Vzorka respondentov ESS je reprezentatívna a tvoria ju obyvatelia domácností na Slovensku 15 a viac rokov, bez ohľadu na ich pohlavie, rodnosť, občianstvo alebo jazyk. Respondenti sú vybraní prísne podľa hodnôt, ktoré sa berú do úvahy, sledná veľkosť vzorky (po odstránení design effects) je 1500 respondentov.

The number of households is set to increase slightly, while the average household size will remain unchanged in Slovakia over 2023-2028. Single person households will remain the dominant household type and the fastest household expenditure growth is forecast to be recorded by single person households.

Eight ESS peer reviews took place from the end of June to December 2021, four of them virtually and four physically. Twelve peer reviews were conducted in 2022, all in a physical or hybrid mode. The remaining eleven peer reviews have taken place in 2023 in a ...

What is Slovakia's attitude towards people who come to live and work in Slovakia? This question can be answered based on data from the 10th round of the European Social Survey (ESS). The collection of data took place in Slovakia from July to November 2021. 1369 Slovak men and women participated in the survey.

The Statistical Office of the Slovak Republic (SOSR) is the central body of the state administration for the field of state statistics. Its status and tasks are governed by Act No. 575/2001 Coll. on the Organization of Activity of the Government and the Organization of the Central State Administration, Act No. 540/2001 Coll. on state statistics ...

Household Budget Survey is a survey, regularly executed by the Statistical Office of the Slovak Republic. It is one of the oldest surveys in the Slovak Republic and it is a part of the social statistics. Data are used for the creation of social policy of the SR Government and for living condition analyses.
