How much does it cost to install a new roof?

The national average cost to install a new roof (with standard materials, not solar shingles) is \$14,643, while the typical upfront cost to install a solar roof is \$49,700 and \$34,700 after the 30% federal tax credit. Many factors will affect the cost of installing a new roof on your house, such as:

Can I install a new roof if I have solar panels?

Though you can install a new roof while panels are installed, the process of installing a new roof on a roof that already has solar panels is straightforward: Contact the roofing company. It'll assess the solar panel installation, do a roof inspection, and provide options for what type of roofing will work with your specific solar panel system.

How much does solar installation cost?

National Renewable Energy Laboratory (NREL) data shows installation labor makes up 7 percent of the total cost of solar, making the average cost of solar installation in the US about \$2,209. The more solar panels you install, the higher the installation cost because the process takes more time and labor.

How much does it cost to reinstall solar panels?

Reinstalling solar panels accounts for the larger share of costs. On average, the cost to uninstall and reinstall is between \$3,000-\$5,000. The price is subject to factors like roof pitch and roof accessibility, as well as the number of panels installed, so it could fall outside of that range for large panel systems or systems on difficult roofs.

The average cost of a solar roof system is \$16.15 to \$25.40 per installed square foot or \$4.50 to \$8 per watt. However, this price can vary depending on your home's size and the solar shingles manufacturer. The 30% ...
