

## How often should the generator belt of Fengjun 5 be replaced

How often should you replace a generator spark plug?

Every year: Replace the spark plug. How Do I Maintain My Generac Portable Generator? All generators require periodic maintenance, such as oil and filter changes, to ensure maximum performance for years of reliable service. Refer to the owner's manual for routine maintenance procedures and schedules.

How often should I Change my Generator oil?

After every 50-100 hours (exact intervals are specified in your user manual), change your oil regardless of the oil levels. If you haven't changed the oil for 3-6 months, change it regardless of how long you've been using the generator. Both procedures are explained in every user manual and can differ a bit from generator to generator.

How often should a generator air filter be cleaned?

Maintenance tasks like an oil change should be done every 50 to 100 hours of operation or 6 to 12 months if this comes first for a portable generator. Similarly, you should clean your generator air filter about every 50 hours of use or every 3 to 6 months.

What should I do if my generator is not working?

In general, disassemble your generator according to the manual, avoid applying any liquids to electronics. Clean both exterior and accessible interior of the generator unless specified not to by the manual. Do not force your way into any parts, as that may void your warranty. NEVER USE A POWER WASHER, NOR A HOSE!

Should I use OEM parts for my Generator?

As a rule of thumb, try to stick to OEM parts. Any additional instruments which are part of your generator, namely CO sensors, have their own maintenance requirements which must be attended to, to ensure their functionality.

Do I need a professional to maintain my generator?

As a rule of thumb, all parts easily accessible to the user are maintained by them (oil, fuel, spark plugs, etc.) and vice versa, all parts which are not (engine, electronic circuits, etc.) are to be maintained by a professional. Before we start, we urge you to refer to your user manual. Consider it your own Generator Bible.
