What is solar panel mounting & racking?

What is Solar Panel Mounting and Racking? Mounting solar panels refers to the process of installing solar energy systems onto a structure such as a building or ground mount. The procedure usually involves securing the panels with a racking system on the rooftop or ground and connecting the system to the power grid.

How to install a solar panel?

The first step is to attach the fixing bracket to the solar panel. Lay the solar panel face-down on the tarp or canvas to protect the photovoltaic surface. You want to be sure the mounting holes on the back of the panel align with the holes in the fixing bracket. Don't modify the module frame because doing so may void your manufacturer's warranty.

How do you attach mending plates to a solar panel?

Measure the distance between the mounting holes on the back of your solar panel. Use this distance to mark where to attach the mending plates. Screw the mending plates to the angled side (the hypotenuse) of the brackets. Attach two plates per bracket, oriented inward. Here's a video illustrating what I mean:
